

Saving the Saffron Brook

This is an exciting new project which aims to transform the Saffron Brook/Wash Brook catchment!

We have the opportunity to offer at least 10 schools in the catchment area engagement workshops and activities centred around restoring and protecting the river

School Workshops

- We will be putting on over 150 activities and workshops in total
- The amount and frequency of sessions is up to you as a school
- This will run throughout 2022 and early 2023
- The workshops will be a mixture of practical activities and taught sessions
- They will be based on themes related to saving the brook including:
 - Litter
 - Marine life
 - Water
 - Climate change
 - Biodiversity
 - Sustainable living
 - School grounds
