

The Dynamic Support Pathway

The Dynamic Support Pathway (DSP) is an all-age early intervention pathway for people with Learning Disabilities, Autism or both. The DSP is for people living in Leicester, Leicestershire and Rutland (LLR).

The DSP has been developed to provide timely support for individuals with a Learning Disability, Autism or both whose health or wellbeing is deteriorating. It aims to ensure they can continue to stay well at home in the community. The goal is to identify concerns early and provide additional support that will prevent further deterioration or escalation that could lead to a crisis.

The DSP is also for patients returning to the community after an inpatient stay. A multi-agency meeting (MAM) can be set up to monitor the delivery and suitability of their discharge plan.

The DSP now consists of two registers – the existing Risk of Admission Register (ROAR) for crisis management, and the new Dynamic Support Register (DSR) for crisis avoidance.

Professionals working in Health, Social Care and Education can refer people to the DSP. Please use the following link if you want to make a referral to the ROAR or the DSR: lrladmissionavoidancetool.leicestershire.nhs.uk

The service operates Monday to Friday within working hours and is not available on bank holidays.
